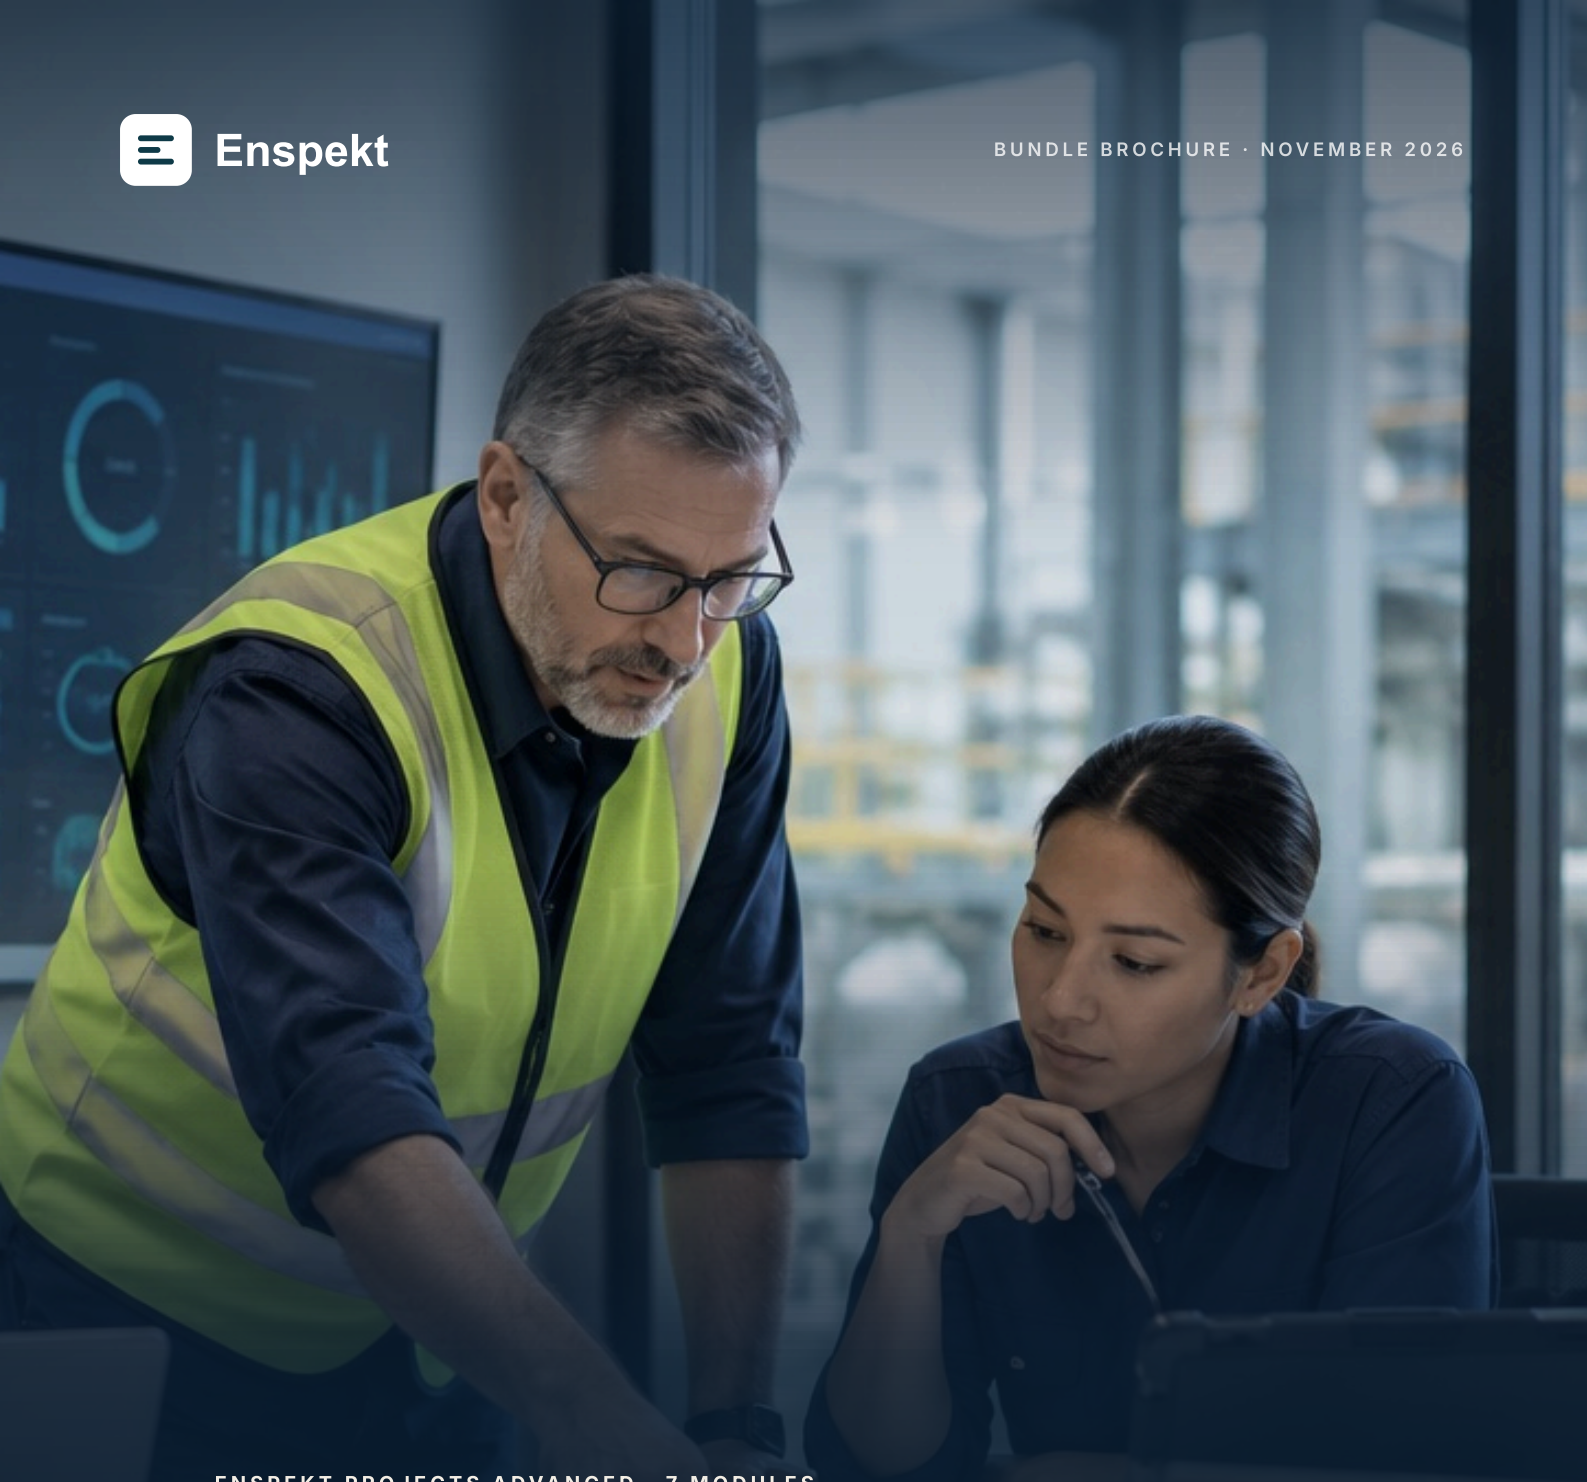
Enspekt

BUNDLE BROCHURE · NOVEMBER 2026



ENSPEKT PROJECTS ADVANCED · 7 MODULES

Run the project from contract to handover.

Seven areas inside the project you already keep in Projects Basic: the contract and its money, the people on it, its drawings and documents, the schedule, the site, the subcontractors and the completion records.

- BOQ, variations and payment certificates
- CPM schedule with Primavera P6 import
- Checksheets, certificates and handover

One project record, every discipline on it.

Commercial, planning, document control, site and completion teams usually keep their own spreadsheets about the same project. Here each team works in its own tab of one project, every member sees only the areas they are granted, and the figures move from one area to the next without retyping.

Money you can trace

A payment certificate is built from the bill of quantities and approved variations, and creates a draft receivable invoice in Accounting.

A plan the site follows

The CPM schedule, daily site reports and punch lists sit in the same project, so progress on site is read against the plan.

Handover ready

Systems, checksheets and completion certificates are tracked tag by tag, and the handover documents are filed for the client.

What's included

7 modules in the Projects Advanced bundle

- **Project Commercials**
  Contract terms, cost codes and budget, bill of quantities, variations, interim payment certificates that create draft receivable invoices, and cost against budget.
- **Project Resources**
  Role demand, named people and crews checked for availability and competence, a resource histogram, site timesheets and labour cost on cost codes.
- **Project Documents**
  The engineering document register with planned issue dates, revisions and files, transmittals with return codes A to D, and RFIs.
- **Project Schedule**
  Work breakdown, activities with all four link types, calendars, critical path and float, baselines, and import from Primavera P6 or MS Project.
- **Project Site**
  Daily site reports that work offline on a phone and are countersigned by the client, and punch lists pinned on drawings.
- **Project Subcontracts**
  Subcontract packages with a schedule of rates on cost codes, retention, advance and defects terms, award, variations and subcontractor certificates.
- **Project Completion**
  Systems and subsystems, tags allocated to subsystems, A/B/C checksheets, punch by category, completion certificates, handover documents and earned value.

HOW IT WORKS / 03

From award to handover.

Contract
Terms, BOQ, budget

Plan
CPM and baseline

Resource
Crews and timesheets

Build
Site reports, punch

Certify
Payment certificates

Hand over
Certificates, dossier

Granted per area
Seeing a project does not show its money: each of the seven areas is granted to a member on its own.

Works on site
Daily site reports are written on a phone without a signal and sent when it comes back.

Client countersignature
The client signs a daily report on the device or in the client portal.

Bring your schedule
Import a Primavera P6 XER or MS Project XML file instead of building the schedule again.

Earned value
Planned, earned and actual cost on one curve, from the schedule and the cost codes.

In beta
All seven areas are in beta: in use and supported, and still changing with customers' feedback.

BUILT FOR Project manager · Quantity surveyor · Planner · Document controller · Site engineer · Completion engineer

Enspekt

PART OF ONE PLATFORM

Works with the rest of Enspekt.

Projects Basic, the project hub, comes with every bundle; Projects Advanced adds these areas inside it.

ACCOUNTING

Payment certificates create draft receivable invoices, and subcontractor certificates are paid through payables.

SUPPLY CHAIN

Project purchase orders and requisitions are bought through the same purchasing as the rest of the company.

QUALITY

Handover documents are filed into the project's manufacturing record book for the client.

DRAWING TAKE-OFF

The material take-off from isometrics and P&IDs is its own app on the same project.

ON EVERY ENSPEKT WORKSPACE

- Offline-first field app
- Reports & analytics
- Complete audit trail
- Role & module permissions
- Multi-factor sign-in
- English & Arabic

See Projects Advanced in your workflow.

Book a demonstration built around your own processes, or create a workspace and switch the Projects Advanced bundle on.
