

— ENSPEKT KPI & PERFORMANCE

KPIs people can trust.

Define each metric once, own it by position, collect figures automatically where the data already lives, and verify the rest before they count.

Collected from NCR, CAPA, audit and OTD data

Maker-checker verification

Scorecards tied to responsibilities

One version of every number, with an owner behind it.

KPI spreadsheets drift: formulas change, targets move and nobody checks the figures. Enspekt keeps a registry of metrics with stated formulas and owners, versions every change, and refuses a figure verified by the person who entered it.

Defined once

Every metric carries a formula, an owning position and an optional link to a responsibility.

Figures you can defend

The database refuses self-verification; filed figures are corrected by a new version, never edited.

Clear targets

One target per period with RAG bands that know whether higher or lower is better.

What's included

KPI & Performance: one module, everything below

Metric registry

Formula, owning position and responsibility link; edits create a new version.

Automatic collectors

About 14 collectors compute KPIs from NCR, CAPA, audit, OTD, complaint and document data.

Starter packs

ISO 9001, ISO 45001, IATF 16949 and procurement packs, tagged by clause.

Targets and RAG bands

Threshold or range bands per period; revisions need a reason.

Verified figures

Maker-checker verification, with the verified share shown on scorecards.

Assignment

Assign to a position (inherited by its holder) or to one person.

Scorecard reviews

Review cycles with moderation and no reviewing your own scorecard.

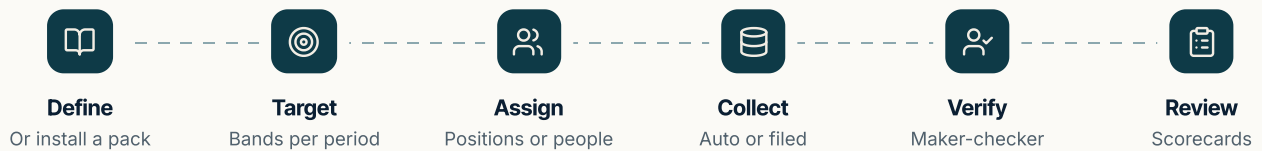

Explore and drill through

Open any figure down to the source records behind it.

≡ HOW IT WORKS / 03

From a definition to a reviewed scorecard.

Counterbalanced packs

Each pack metric is paired with a counterbalancing one, so a target cannot be gamed in isolation.

Versioned everything

Definitions and filed figures keep their history; corrections are new versions.

Verified share

Scorecards show how much of each result rests on verified figures.

Meeting mode

Walk through the KPIs in a review meeting, with calibration across reviewers.

Suggested targets

Target suggestions from history, and bulk import for existing figures.

Programme health

See which metrics are stale, unowned or missing figures across the programme.

BUILT FOR

KPI owner

Data filer

Verifier

Line manager

Quality or HR admin

Works with the rest of Enspekt.

KPIs draw on, and feed, the rest of the platform.

COMPLIANCE

Management review reads live KPIs into the ISO 9001 §9.3 agenda.

QUALITY AND MANUFACTURING

Collectors compute KPIs from NCRs, CAPAs, audits, complaints and on-time delivery.

HR & PAYROLL

KPIs appear on each person's My Responsibilities, tied to the roles they hold.

ON EVERY ENSPEKT WORKSPACE

 Offline-first field app

 Reports & analytics

 Complete audit trail

 Role & module permissions

 Multi-factor sign-in

 English & Arabic

See KPI & Performance in your workflow.

Book a demonstration built around your own processes, or create a workspace and switch the KPI & Performance bundle on.
