

— ENSPEKT WAREHOUSE · 11 MODULES

Stock you can trust, lot by lot.

Receive into quarantine, release after inspection, store by rule and pick by expiry, with every movement recorded against its lot.

Received lots held until QC release

FIFO and FEFO picking, expiry refused

Zone to bin locations with segregation

A warehouse that knows what it may ship.

A stock figure without lot, expiry and inspection status is a guess. Enspekt keeps every lot's location, quality status and expiry together, so only released, in-date stock is picked.

Quality before stock

Two- and three-step receiving lands lots in quarantine until their inspection lot releases them.

Right lot, first

Pick lists allocate FIFO, FEFO, LIFO or LEFO, and expired lots are refused at picking.

Counts that reconcile

Approved cycle counts apply their variances to stock in one step.

What's included

11 modules in the Warehouse bundle

Warehouse Management

Dashboard, locations, lot registry and stock transactions.

Locations & Slotting

Zone, aisle, rack, bin and shelf, slotting and segregation rules.

Inventory & Cycle Counts

Lots, cycle counts, ABC classification and material holds.

Picking & Dispatch

Pick lists with shortfalls and PDF, goods issue notes and kits.

WIP Staging

Stage-based tracking of jobs moving through production.

Returns (RMA / RTV)

Customer returns with disposition, supplier returns and scrap.

Yard & Dock

Dock doors, truck appointments, yard slots, arrive and depart.

Replenishment Routing

Min/max reorder rules that raise purchase requests; putaway rules.

Goods Receipt

PO-linked receipts that trigger inspection; labels and QC tags.

Shipment Documents

Packing lists and delivery notes for outbound shipments.

Material Requests

Work-order requests that raise pick lists for production.

≡ HOW IT WORKS / 03

From the dock door to the right lot on the right truck.

Dock

Inspection triggered

Release

After QC

Store

Putaway, counts

Pick

FEFO, GIN

Ship

Or return

Rotation exceptions logged

Skipping an earlier lot or breaking the shelf-life floor needs a recorded override.

ABC by value

Classify items by Pareto on annual usage value to focus counting effort.

Holds by type

Place material on hold by type; only a manager can release it.

Labels at receipt

Receiving labels, HOLD/PASS/FAIL QC tags, lot labels, delivery slips and the GRN voucher.

Returns with a decision

Customer returns are dispositioned; scrap needs an approval before it leaves stock.

Expiry in view

An expiry and FEFO screen shows what is close to date and where it sits.

BUILT FOR

Storekeeper

Receiving clerk

QC inspector

Picker

Warehouse supervisor

Planner

Works with the rest of Enspekt.

Every movement in the warehouse is a record the rest of the platform can use.

QUALITY AND SUPPLY CHAIN

Inspection lot status gates release, and reorder rules raise purchase requests.

MANUFACTURING

Work orders issue from lots against their goods issue note, and material requests raise pick lists.

ACCOUNTING

Receipts book inventory against GRNI, lot cost flows to cost of goods sold, and landed cost layers on top.
